SCOLIOSIS
Scoliosis (spinal curvature) is an important health problem for adolescent girls and many are at risk of developing a significant curve. Because in the early stages the condition is most often asymptomatic, screening in the age range 11-13 years is a sound preventative health measure. Parents of girls in Years 7-9 are encouraged to visit the Scoliosis Australia website at www.scoliosis-australia.org and download a copy of the Self Detection Brochure.

UNDER 8'S DAY
Last Friday all of our under 8's, including the kindy group from Glenella Childcare, participated in a morning full of wonderful activities. The children enjoyed playing with play dough, goop, face painting, water play, mousercise, kite making and bubble blowing.
A big thank you to the parents who donated items for this successful event, as well as the wonderful helpers on the day. It was also lovely to see some of the older students helping out with the activities. The children had a great time as you can see from these many smiling faces.
